

ALUMINUM HANDLINE HOOKS

Upon extensive testing for a client, it was found that there was not a handline hook on the market capable of withstanding 1,000 lbs. of lift that also had a 5:1 Safety Factor. In fact, nothing came even close. But now there is! The DDIN Rated Handline Hooks are engineered for tough work loads and are more than capable of lifting 1,000 lbs. with a 5:1 Safety Factor.

- Approved by the International Linemen Rodeo Committee
- Made from high-strength aluminum alloy
- Available with or without a latch
- Safety Factor: 5:1

PART #	DIMENSIONS	WLL	LATCH	WEIGHT
