

DDIN[®]

REEL LIFTER

The DDIN Reel Lifter is an innovative tool designed to assist the user in flipping reels to a vertical/rolling position. This permits the user to orient the reel in a safe working position for paying out material in the field. This tool is precision machined from premium materials to withstand the toughest of real-world environments.

- Stainless Steel axles to resist harsh environments
- Powder Coated Finish is resistant to chipping, cracking and fading
- Rugged material finishes to protect against corrosion
- High-performance machined components for consistent performance
- Improved lever action to ensure a clean release from your reel every time
- Meets ASME B30.20.1

PART #	ARBOR HOLE	CAPACITY	WEIGHT
DNRL20	2" - 4"	3,000 lbs.	5.9 lbs.
DNRL40	3" - 6"	5,000 lbs.	13 lbs.
